

SPECIFICATION FOR QUANTITIES, DIMENSIONS AND PACKAGING

1. Orders will be considered complete if the quantities shipped are +/- 10% of the quantity ordered.
2. Length measurement tolerances are +/- 1%.
3. Roll width tolerances are +/- 1/32".
4. Minimum roll width is 3".
5.
 - a. Minimum roll length is 2,500'. We can offer specific roll lengths; however, these rolls may have extra splices.
 - b. Specific roll lengths can be offered only when the full master width is trimmed; however, these rolls may contain extra splices.
 - c. Coat-to-order products require the full master width to be trimmed and have minimum order length quantities depending upon product
6. 3" cores are standard. We recommend 6" cores for all material that is required to lay flat for sheeting.
7. Pallet sizes: We have the following pallet sizes available:

32" x 48" 32" x 32" 40" x 40"
44" x 44" 36" x 36" 40" x 48"
8.
 - a. Cradle packing is available on rolls 5,000' or longer. These rolls are packed on either

32" x 48" pallets, or
40" x 48" pallets
 - b. Cradle packing: A minimum of 32" total width per order position.
 - c. Cradle packing: A minimum roll width of 6" will be cradle packed.
9. Trimless requirements: A minimum of 12" total width per order position.
10. Splice Tolerance for Slit rolls: When order length is:

< 7,500'	2 splices
≥ 7,500'	3 splices
> 10,000'	4 splices
