

UPM Adhesive Materials Food safety policy

UPM Adhesive Materials provides high-performance, innovative self-adhesive products, including label materials, graphics solutions, and specialty tapes, as well as reliable services close to customers.

UPM has a wide range of self-adhesive products designed and manufactured for use in various food packaging meeting the relevant regional regulatory requirements, as well as product safety and quality standards. UPM strives to mitigate applicable product safety risks and provides transparent product safety communication as required by customers.

UPM's food safety management system is based on the ISO 22000, FSSC 22000, or BRCGS standards. It is integrated into UPM's company-wide ISO 9001/14001/45001 certified management system. These management systems form the basis for compliance with regional Good Manufacturing Practice (GMP) requirements related to food safety.

UPM Adhesive Materials management sets key food safety targets annually. Continuous development and training of personnel are essential to achieving business objectives, food safety targets and consumer safety. Regional Food safety teams monitor, review, communicate and improve the performance of the food safety system.
